

**To the Central Committee
of the Communist Party of Greece**

Dear Comrades,

Communist Party of Poland sends its warmest comradely greetings on the occasion of the 95th anniversary of the founding of the Communist Party of Greece (KKE).

For 95 years KKE remains one of the main and distinguished communist party in Europe. It has been an inspiration for the working people of not only Greece but the entire Europe, being a representative of the working class' interests and the organizer of the class struggle. Its heroic fight against fascism, both domestic and foreign, through the Resistance of EAM-ELAS, was an example for the entire progressive world.

Nowadays, after 95 years, KKE remains the only political force of Greece that is still committed to the cause of class struggle and offers a working class anti-capitalist response to the crisis of capitalism. It greatly contributes to the cause of the international communist movement both in developed and developing countries giving an example and helping to organize international activities of the progressive forces. KKE shows us that communist tradition and modern program that was adopted during its 19th congress may be used in favor of the working class.

We salute the great tradition of the KKE, its former and present struggle, masses that used to and still are organizing activities of the Party. We would like to wish our Greek comrades many successes on the field of struggle against capitalism.

Long live the Communist Party of Greece!

Long live international solidarity!

On behalf of the CC of the Communist Party of Poland

Krzysztof Szwej
Chairman
